Technical details :

- This bot is able to buy and sell token from a specific contract faster than using PooCoin or PancakeSwap

Requirement :

This software runs under Python 3.9

Installation :

- Windows

Requirement

- 1) Install Python 3.9

Browse this address :

<https://www.python.org/downloads/windows/>

Choose "Download installer" :

Note:

Use 64-bit version

if installation fails, re-download 32bit version

Get installer version, not embeddable package

Install

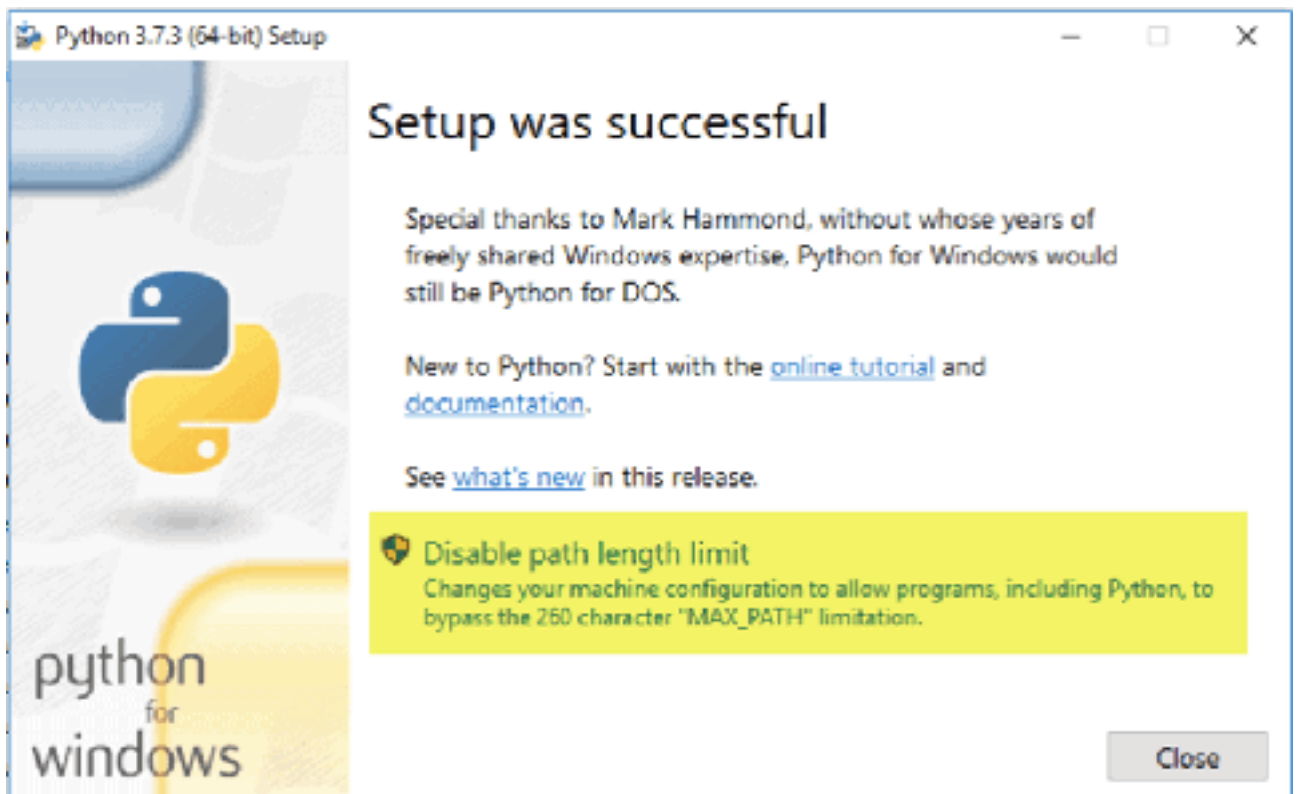

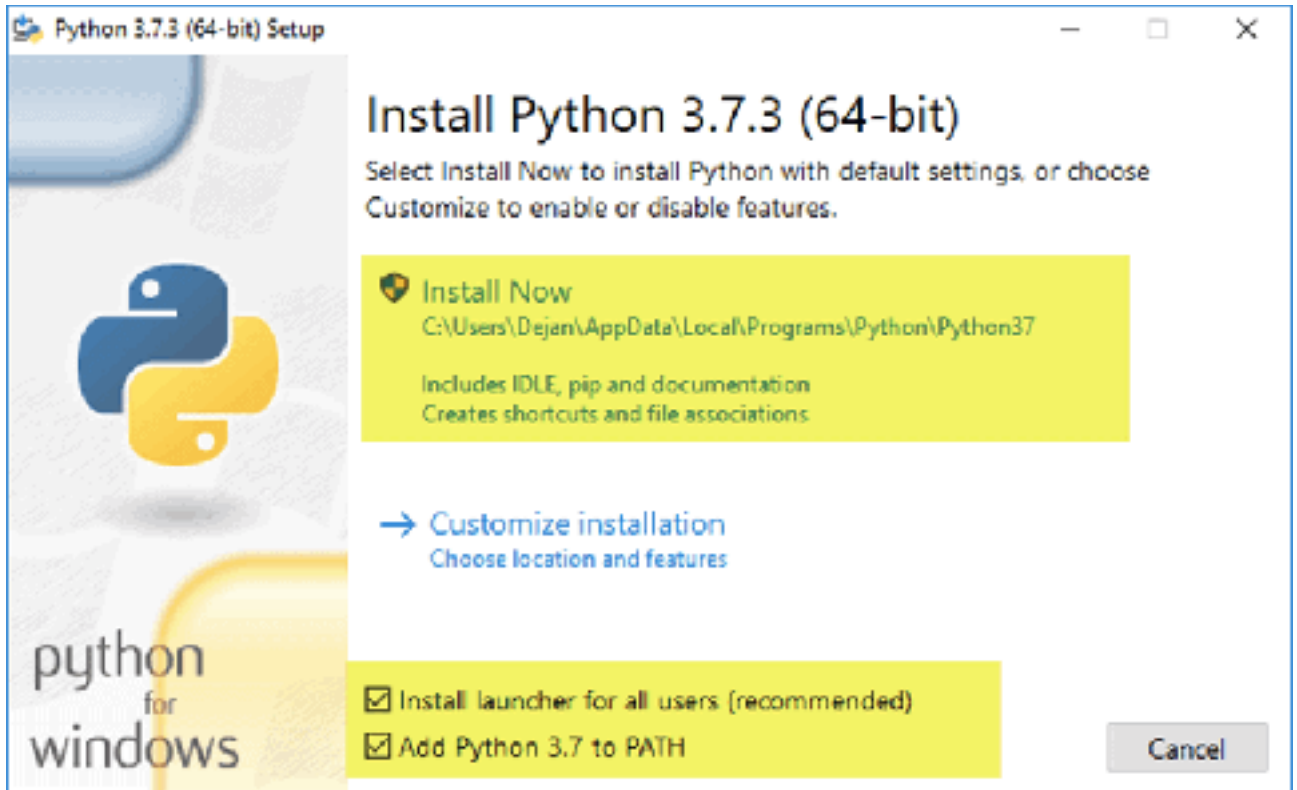

Open downloaded installer and follow instructions

If installer asks you to add python to PATH, select this option - very important

Note :

Complete install tutorial can be found here :

<https://phoenixnap.com/kb/how-to-install-python-3-windows>

Verify Python installation :

Open windows terminal by striking <WindowsKey> + R keys

Type : cmd

Hit <enter>

-> Black command window should open

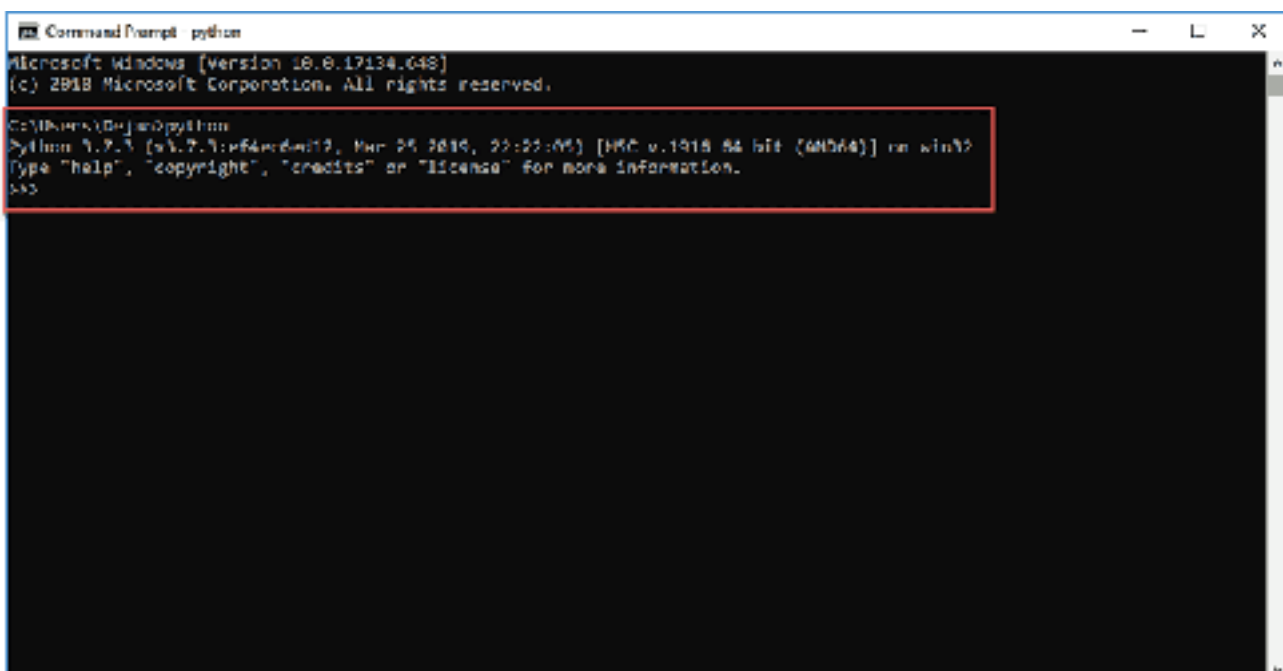

Type :

python

strike <enter> key

into command prompt

You should have this :

```
Command Prompt python
Microsoft Windows [version 10.0.17134.048]
(c) 2018 Microsoft Corporation. All rights reserved.

C:\Users\Benjamin>python
Python 3.7.3 [tags/v3.7.3:ef644cc19, Mar 25 2019, 22:22:05] [AMD64 v.1918 64 bit (AMD64)] on win32
[Type "help", "copyright", "credits" or "license()" for more information.]
>>>
```

Type :

quit

<enter>

-> This should quit python, you can also use CTRL+Q to quit python

Install Bot

Extracting bot

Get the zip file of the bot

Put zip file into your home folder which should be :

C:\Users\<MYUSERNAME>

Unzip the archive in you home folder by double clicking archive file :

-> You should have :

C:\Users\<MYUSERNAME>\SimpleBuySell

Install dependencies :

Open Windows prompt / terminal :

<WindowsKey> + R

cmd

<enter>

Go into install folder by typing :

cd c:\Users\<MYUSER>\SimpleBuySell

<enter>

Install bot dependencies by typing :

pip install -r requirements.txt

<enter>

-> This operation should complete without errors

Configuring bot :

Now the last thing is to put your private wallet key in the config file.

So the bot can perform buy and sells.

For security reasons I highly recommend you to create a specific wallet to use this bot.

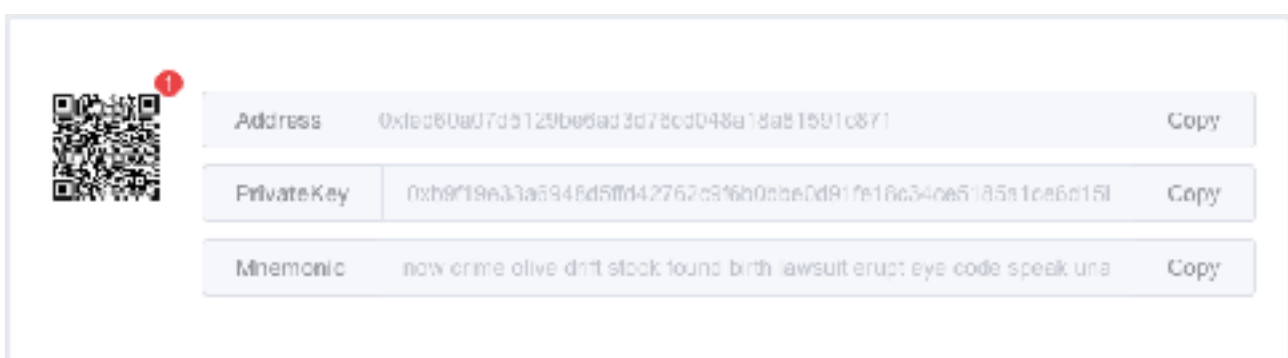

The reason is that you cannot trust anyone in crypto space, even this bot could be a scam. So it's a good practice, create a new wallet, put only few bucks on this wallet, test bot, if everything works fine, then you can add more funds. The code of this bot is open source so you can check by yourself or with someone that knows python and web3 library.

Anyway enough talking, let's do this.

To create a new wallet you can go here :

<https://cointool.app/createWallet/bsc>

Enter 1 as the number of wallet you want to create and you get this :

The screenshot shows a wallet creation interface with a QR code on the left and three rows of data on the right. The first row is labeled 'Address' and contains the hexadecimal string '0x1ed60a07d5129b06ad3d78cd048a18a81501c871' with a 'Copy' button. The second row is labeled 'PrivateKey' and contains the hexadecimal string '0xb9f19e33a5948d5ff42767c916h0bbe0d91fe18e340e5185e1ce6d151' with a 'Copy' button. The third row is labeled 'Mnemonic' and contains the phrase 'now crime olive drift stock found birth lawsuit erupt eye code speak una' with a 'Copy' button. A red notification bubble is visible above the QR code.

| | | |
|------------|--|------|
| Address | 0x1ed60a07d5129b06ad3d78cd048a18a81501c871 | Copy |
| PrivateKey | 0xb9f19e33a5948d5ff42767c916h0bbe0d91fe18e340e5185e1ce6d151 | Copy |
| Mnemonic | now crime olive drift stock found birth lawsuit erupt eye code speak una | Copy |

Enter private address you copied from created wallet between quotes " on second line like this

```
WALLET_ADDRESS = "3c599922163a6c758f7b48cd0e0c8f5000403f000" # Add your Wallet Address here by removing whole line
PRIVATE_KEY = "3c58f13c33a59446511442762c916466b6c917e10c34cc513591c2e51e594e44e" # Add your private wallet key here between " " same like above

TRADE_TOKEN_ADDRESS = None # Add token address here example : "3c55c3b44e97127884864d21c5775cd046257bd0"
MEMO_ADDRESS = "3c04c39c3d04861b81c8e0f2de66c5173bc89c"
PARKING_ROUTER_ADDRESS = "3c146b41c18714eb63c5a57b70054704e255324e" # Contact : #089501c27f54c444f0181754a075c5281551891
```

DO NOT CHANGE ANYTHING ELSE IN CONFIG FILE

And that's it, bot is configured

You don't have to do this procedure anymore, only use below second to use the bot

Bot Usage and test :

In windows command prompt (<WindowsKey + R> -> cmd -> <enter>):

Go into bot folder using command :

```
cd c:\Users\<MYUSER>\SimpleBuySell
```

```
<enter>
```

start bot using :

```
python model/main.py
```

```
<enter>
```

-> You should have this :

```
True
2022-01-19 10:48:23,482 - root - INFO - Enter contract address
```

Copy contract address from Telegram or Poocoin :

Tips : contract address is the last part of Poocoin shared link

<https://poocoin.app/tokens/0xddf0ab7ea1833c362904bf7aafe11a3057fba21e>

Paste contract into command prompt using right click -> paste -> <enter>

You should have this :

```
2022-01-19 10:42:26,850 - root - INFO -
StartCoin
2022-01-19 10:42:26,850 - root - INFO -         uuid           : 4651b5af-b49b-479f-b80f-a91bf279933c
2022-01-19 10:42:26,851 - root - INFO -         tokenAddress    : 0x0000000000000000000000000000000000000000
2022-01-19 10:42:26,851 - root - INFO -         RefreshRate     : None
2022-01-19 10:42:26,852 - root - INFO -
EndCoin
2022-01-19 10:42:26,852 - root - INFO - Do you want to buy or sell ? [b/s]
```

Type b + <enter> to buy, s + <enter> to sell tokens

Do not enter anything else than b or s

You should have this:

```
2022-01-19 10:42:27,701 - root - INFO - Buy Amount in BNB ?
0.005
```

Enter buy amount in BNB + enter

In your windows command prompt you should now have this :

```
2022-01-19 10:42:35,510 - root - INFO - ==> BUY COMPLETE <==  
2022-01-19 10:42:35,511 - root - INFO - BOUGHT STATUS : True  
2022-01-19 10:42:35,614 - root - INFO - Enter contract address
```

Bot is waiting for another contract address to buy or sell token.

By letting this window open you can buy faster.

Just paste contract, choose buy (b) and enter BNB amount you want to buy and hit enter, and that's all.

So to be fast, just open the bot when you want to be ready to buy, or leave this window open, or re-open it and relaunch bot by doing just :

```
cd C:\Users\MyUser\SimpleBuySell  
python model/main.py
```

Enjoy faster buying and selling without using Pancakeswap nor Poocoin

Price :

Far from now price is 0.1 BNB for unlimited run
